

OUR STARMAP

(Because roads have restrictions, whereas our ideas do not)

SEPARATE & ONE, AT THE SAME TIME

In a space that moves very fast it's extremely important to us that every single thing we build, regardless of purpose, all have one thing in common; that is an intrinsic link benefiting aw0k3n owners. Why you may ask? Because that is where our amazing journey started. We now have an amazing community who love the art and have believed in it from day one; we want to pay you back by continuing to innovate in this space.

Our goal is to share cool art in its many forms with the world, whilst creating useful value for the community in innovative ways. Being an art-first project we've had to think bigger, outside the box, and be more ambitious with our approach. With that, our plan is to use our skills to create fun and innovative stuff on Cardano that will get in-front of new audiences, who we can then introduce to aw0k3n algorithms through our intrinsic project links. The result... our ecosystem:

OUR COURSE IS PLOTTED

We hope this Starmap serves as a great resource as we continue our journey. So that we can progress together, it's important that everyone involved knows exactly where we're headed and why. For those of you wanting to join us on this journey, our course is plotted so strap up because it's going to be a great ride.

OUR CORE TEAM

We prefer the less talking and more action approach. Not followers of the norms, instead supporters of innovation. Creating cool stuff on Cardano since 2021.
